

STEEV THOMAS

Junior Software Developer

Manchester, M13 0DP | stevethomaswk@gmail.com | 07501 435443 | steevthomas.com

PROFILE

MSc Computing graduate and full-stack developer with 4+ years of hands-on experience building and maintaining production web applications across JavaScript frameworks, WordPress, and cloud infrastructure. Currently expanding into C#.NET and SQL Server, with strong foundations in Git-based workflows, agile collaboration, and writing clean, maintainable code. Eager to grow within a structured development team and contribute to real-world software projects in a CI/CD environment.

TECHNICAL SKILLS

Languages & Frameworks	JavaScript (ES6+), React, Angular, Node.js, HTML5, CSS3, C# (learning), ASP.NET (learning)
Databases	SQL Server (learning), MySQL, Supabase (PostgreSQL)
DevOps & Cloud	Git, GitHub, Azure DevOps (exposure), AWS (CloudFront, EC2), CI/CD pipelines
Tools & Platforms	WordPress, Shopify (Liquid), Visual Studio Code, cPanel, Plesk
Practices	OOP, REST APIs, Agile/Scrum, code review, test-driven development fundamentals

WORK EXPERIENCE

E-Commerce Developer (Part-time)

Ledivano Italia | Sep 2024 – Dec 2025 | Dublin, Ireland

- Built and maintained a full Shopify storefront using Liquid templating — managing 100+ product listings with 99%+ data accuracy across all catalogue updates.
- Wrote JavaScript customisations and theme modifications to enhance UI, introducing card-based layouts and embedded video — reducing bounce rate and improving session duration by ~20%.
- Delivered a full platform migration (WordPress to Shopify) in under 6 weeks with zero downtime, coordinating content, theme development, and store configuration end-to-end.
- Implemented on-page SEO and analytics instrumentation via Google Analytics, identifying UX issues that drove a ~15% improvement in add-to-cart conversion rate.
- Maintained a clean Git workflow for theme versioning and tracked all code changes across releases.

Web Developer (Remote)

Stride Real Estate LLC | Feb 2022 – Jan 2024 | Dallas, TX, USA

- Developed and maintained 3 production Angular and React applications supporting real estate operations — achieving 99.5%+ uptime across all deployments.
- Reduced average page load time by ~30% through AWS CloudFront CDN integration and front-end performance optimisation, directly improving user retention.
- Managed 4–6 concurrent projects with remote teams across 3+ time zones — delivering all major milestones on or ahead of schedule.
- Resolved client-reported bugs and change requests with an average turnaround of under 48 hours, maintaining consistently high satisfaction ratings.
- Collaborated with senior developers to implement features from design specs and participated in code review processes.

WordPress Developer

Winsoft Solutions | Mar 2021 – Feb 2022 | Kochi, India

- Delivered 12+ full-scale WordPress websites across retail, hospitality, and services — all launched on schedule with zero post-launch critical defects.
- Reduced average site deployment time by ~25% by standardising reusable theme and plugin configuration workflows.
- Contributed to SEO-optimised product pages achieving top-3 Google rankings for 3 client accounts within 90 days.

PROJECTS

Stealeen — AI-Powered Job Application Tracker (2025)

- Full-stack application built with React, Node.js, and Supabase (PostgreSQL) — featuring automated Gmail scanning via Google Apps Script and AI-powered job detail parsing.
- Demonstrates ability to design and integrate APIs, manage database schemas, and build maintainable full-stack features end-to-end.

Physio de Casa — Real-Time Physiotherapy Web App (2025)

- React and TensorFlow.js application using real-time webcam-based pose detection — built to production-ready quality with clean component architecture and state management.
-

EDUCATION

MSc in Computing Science — Second Class Honours

Griffith College, Dublin | 2024–2025

BE in Computer Science Engineering

DMI Engineering College | 2016–2020 | CGPA 6.5
